Installing MongoDb

▶ Go **here** and download either the MSI package or ZIP file containing the required files. Make sure to switch to the Server tab to find the required download.

▶ As a personal choice, I will download the latest release version available now from the above website (link also appears in the attached resources on the Udemy course platform)

▶ So let's get back to the MongoDb website which is again reproduced below: https://www.mongodb.com/download-center/community
